FFL**2R G2**

FORMFOCUS

The FormFocus FFL2R provides highly efficient LED illumination in a sleek, modern lay-in. This high efficacy troffer solution is available in 2x2 and 2x4 sizes - **and now in 90+ CRI standard!**

- Available in a wide range of lumen output packages
- "High Output (HO)" models available with output ranging from 6,400 in the 2x2 to over 17,000 in the 2x4
- Multiple control options - from simple on/off occupancy sensing to advanced network and IoT controls
- Re-boardABILITY prevents obsolescence by ensuring you always have a way to secure the highest efficiency LED modules for your luminaires
- Made in the USA - in our Henderson, NC facility - using mostly domestic and some foreign components. BAA compliant models available
